Now Live at beanfun! Gamania Digital Entertainment secures their Online Game services with Keypasco

Gothenburg, October 14th, 2013 – Keypasco announces that Gamania Digital Entertainment Co., Ltd. (Gamania) in Taiwan is deploying Keypasco's Embedded Authentication Service (EAS) solution to secure its online gaming services. Gamania's 2.6 million active customers will benefit from Keypasco's unique authentication solution and technology.

Gamania has integrated the login authentication on its new www.beanfun.com platform with Keypasco's cloud-based authentication service. After several beta tests with large numbers of end-users, Gamania has decided to roll out the new secure login solution on October 2nd, 2013.

"We feel comfortable and confident with the Keypasco authentication solution after the six months of integration and testing. The Keypasco solution is a revolutionary one; it is a true "Bring Your Own Device" secured with Keypasco's patented technology. The affordable cost, easy to integrate and roll-out function, user-friendly interface and continuous improvement of security are the reasons why we now start to offer it to our users," commented Vincent Chuang, Chief Operating Officer at Gamania TW.

Maw-Tsong Lin, Founder and Chief Executive Officer at Keypasco, commented: *"This is really the moment for celebration: a milestone and a paradigm-shift within Internet security, from an idea to a product and now for mass roll-out! We would like to give our sincere thanks to the Gamania team and management for their courage to deploy a new technology. We are also grateful for their knowledge and advice during the process of making the Keypasco solution ready for the market! Our Partner in Taiwan, Lydsec, and the Keypasco team has done an excellent job during this period. Now we have a mature product covering a wide range - from PC, tablets to smartphones for different market segments and applications."*
