

## Keypasco Selected as Red Herring Top 100 Europe 2016 Winner

**Gothenburg, April 19th, 2016** – Keypasco has been recognized as a winner of the **Red Herring Europe 2016 Award** based on innovation and a sound business model for its Keypasco secure multi-factor authentication and secure mobility solution, including the Keypasco PKI Sign. In the past, companies such as Palo Alto Networks, Tenable Network Security, Veracode, Checkmarx and Qualys were among the winners of Red Herring technology Award. This award is a prestigious list honouring the year's most promising private technology ventures from the European business region.

The Keypasco offer a patented software-based authentication solution by using the user's own device without additional hardware token, Security by Your Own Device. Keypasco secures the mobile platform in a way no hardware token can ever do. All online services and mobile applications can be secured by the Keypasco technology. Online service providers can even enhance their ability to compete with this solution, as it offers added value for the end user and secure branding for the eService. Security of the mobile platform has never been easier.

With users ranging from major banks, to eService businesses and international gaming companies, Keypasco is available to all businesses looking for a secure authentication and/or secure mobile solution to improve security.

Keypasco has previously been awarded for their secure authentication solution. Keypasco won in 2014 the New Product Innovation Leadership Award for Secure Authentication by Frost & Sullivan. Frost & Sullivan then described Keypasco as *"a true pioneer of the 21st century for mobile security."* Keypasco is also in the running for the Contactless & Mobile Award in the category of Payment Security, and the winner will be announced the 26th of April 2016.

*"I am happy that we have been awarded the Red Herring Top 100 Award. It is a great acknowledgement that our solution is innovative and unique. The largest difference between our mobile security solution and other look-alike mobile solutions is that we use a revolutionary and innovative technology (patents approved) while others still only use traditional technology wrapped in a new shell. Our solution offers our customers possibilities to create new services that were not possible before. It is going to be a natural part of our daily life,"* commented Mr. Maw-Tsong Lin, Founder and Chief Executive Officer at Keypasco.

Mr. Maw-Tsong Lin and Per Skygebjerg

Red Herring's Top 100 Europe list has become a mark of distinction for identifying promising new companies and entrepreneurs. Red Herring's editors were among the first to recognize that companies such as Facebook, Twitter, Google, Skype, SalesForce, YouTube, and eBay would change the way we live and work. The Red Herring's editorial team selected Keypasco out of a pool of two thousand from across Europe. Winners for the 2016 edition of the Red Herring 100 Europe award are selected based upon their technological innovation, management strength, market size, investor record, customer acquisition, and financial health.

### About Keypasco

With more than 25 years of individual experience in IT security, Keypasco's founders are the minds behind some of the revolutionary authentication technology solutions used today. Keypasco offer a patent-approved secure authentication and secure mobility solution to Internet Content Providers in the online gaming and financial/banking industry.
